

DNL Panel: Urban Transportation

The citizens of a typical North American city are often dependent on the gas powered car to move people from point A to B. St. John's and other towns and cities in Newfoundland are no exception. How could other, less carbon-intensive options such as cycling and public transit be enhanced? Can we create a transportation system in Newfoundland with zero carbon emissions within a few decades?

DECARBONIZE
NEWFOUNDLAND
& LABRADOR

July 11-12, 2019: YYT

Panelists:

Dave Lane
